"I've just finished listening to your version of Pictures, and it elicits a large "bravo" from this quarter. The orchestration is masterful throughout, and some sections (e.g. the opening of Ballet of Chicks) I prefer to any other I've heard. There are no weak spots in it, and I'm sure this version will be played many times again." -- David Canfield, president, International Kartinki s Vystavki Association

"This Golovanov recording of Pictures at an Exhibition is identified as Mussorgsky-Ravel, but I'm tempted to add Golovanov to the credits! As might be expected, Golovanov adds to the orchestration in numerous passages, usually something to reinforce the already healthy contingent of lower register instruments and/or percussion. He also omits all but one repetition of the "*Promenade*"-- Neal's Historical Classical Recordings Corner; 17 Jan. 2009

Review: <http://www.musicweb-international.com/>

http://www.musicweb-international.com/mwork_index/mussorg_pict.htm

“Yet another *Pictures at an Exhibition*, I hear you say! Well, yes, but this is a somewhat different affair for here is (the late) Lawrence Leonard's rarely heard arrangement for piano and orchestra made [published] in 1977. As a whole it is a quite satisfying compromise preserving most of the piano original (the opening *Promenade*, less spectacular than Ravel's, is for orchestra alone). In most other movements the original material is shared by piano and orchestra in a "concerto-like" manner. It would be idle to list all the differences between Lawrence's arrangement and, say, Ravel's (which is by far the most popular). However some may be singled out. For example *The Old Castle* dispenses with Ravel's saxophone and opts for cello and piano with soft sustaining harmonies including a suggestion of wind (wind machine or soft roll on suspended cymbals, we are not told) or *Goldenberg and Schmuyle*, Goldenberg being given a ponderous, pompous orchestral garment and the piano original kept for the wailing Schmuyle (quite effective indeed). Some movements may sound less impressive than in Ravel's version, e.g. *Bydlo*, *The Catacombs* or even *The Great Gate of Kiev*; but all in all Lawrence's arrangement is well worth having for a change from Ravel's ubiquitous version.” -- *Hubert Culot*

“A new version of "Pictures" was commissioned by the publishers of Mussorgsky's piano original (W. Bessel & Co., Paris) since they were quite taken aback by the enormous success of the Ravel version following its premiere in 1922 under Koussevitzky's direction. They'd assumed that Koussevitzky's commission would not be a success so they asked an orchestration pupil of Ravel himself, Leonidas Leonardi (1901-1967) to provide them with an orchestral version of their own which would out-do Ravel's.

Leonardi duly obliged, dedicated his arrangement to Stravinsky, and conducted the premiere himself with the Lamoureux Orchestra in Paris on 15 June 1924. The US Premiere took place when the New York Symphony Orchestra played it on 4 December 1924 under the baton of Walter Damrosch.”--Edward Johnson

“I have received the reply from Breitkopf and I'm sorry to tell you that this edition of Pictures is unavailable. Breitkopf has never supplied this music for performance and had not reviewed the materials at all until my inquiry to them, at which time they have unfortunately found the score to be incomplete.” -- Ella Marie Winfield, Manager, G. Schirmer Rental Performance, 2009

Re: the message above: “Leonard Slatkin did use sections of this Leonardi arrangement for his "compendium" versions starting in 1991 in the Breitkopf edition. The published score was complete in 1997 when received as a perusal by a conductor. See the Luck's entry below.” -- cfn

#3426 Moussorgsky, Modest. Naoumoff-Moussorgsky - Pictures at an Exhibition, The Piano Concerto; 2 pianos 4 hands edition.

“In April 1994 Mstislav Rostropovich and the National (DC) Symphony Orchestra with Mr. Naoumoff as soloist, presided over the world premiere of Emile Naoumoff's new version in the form of a large-scale piano concerto.” In concerto style with some added music, for piano and orchestra.

“A French critic wrote about Emil Naoumoff's orchestration of "Pictures at an Exhibition": "When he took hold of this mythical work, Naoumoff forgot the arrangements of a Ravel or an Ashkenazy and transformed it triumphantly into a true piano concerto [...]. A work whose success is easily explained by its color, panache, radiance, and supreme fidelity to the spirit of the original, and which may well prompt other pianists to adopt it into their repertoires!" "The orchestration by Mikhail Tushmalov is actually a suite (which should be obvious with a duration of 20 minutes), and omits all *Promenades* except the one preceding *Limoges* in the original (which opens the suite), plus omits *Gnomus*, *Tuileries*, and *Bydlo*. He also cut out three bars from *Limoges* for some reason. Though the Kalmus score mentions Rimsky-Korsakov on the cover, it seems unlikely that Rimsky had much of a hand in Tushmalov's suite orchestration wise. Rimsky conducted the premiere in 1891." -- (T.T.)

Modest Mussorgsky's famous piano suite *Kartinki s vystavki* ('Pictures at an Exhibition', 1874) caught the composer's attention as a child and fascinated him with its seemingly endless potential to inspire orchestral transcriptions. Later, having resolved to teach himself the craft of orchestration, he chose Mussorgsky's piece as a kind of ultimate orchestration étude, making a series of ambitious transcriptions for large orchestra. His final version, incorporating organ and (wordless) chorus into his sonic palette, was completed in 2003.

Wingate's transcription uses a conceptual approach that he calls 'timbre mapping' which seeks to organically embed tone color identities within the piece's structure as meaningful musical events. For example, the work's cohesionary 'promenade' sections are often used to instrumentally foreshadow the 'character' movements directly following them, giving these recurring episodes a subtle feeling of integrated architectural complexity.

The chorus in this transcription does not appear to join the proceedings until its splendid full-voiced entrance at the opening of the final movement (*Bogatyrskiye vorota [V stolnom gorode vo Kiyev]*, a.k.a. 'The Grand Gate of Kiev'), but this is actually a kind of orchestrational trick played on the listener: Throughout the piece, various groups of voices from the choir are instructed to sing *bocca chiusa* [i.e. 'humming'] while seated within the chorus, without giving any outward indication that they are indeed singing at all, so as to add a mysterious depth and resonance to the orchestral tone color at assorted moments across the entire piece. This also serves as a work-wide insinuated foreshadowing of the otherwise shocking choral opening of the 'Grand Gate'. Similarly, the organ is used somewhat sparingly throughout, until the final movement where it takes on an imposing, rafter-shaking prominence, evoking the famous *Maestoso* moment in Saint-Saëns' *Organ Symphony*, and contributing its characteristic thick pedal sound to Wingate's *ne plus ultra*, cast-of-thousands approach to the work's majestic and stirring finale.

This Pictures transcription joins a varied and illustrious company of arrangements that the piece has enjoyed since its composition in the 1870's. The International *Kartinki s Vystavki* Association (IKVA) catalogs over well over two hundred transcriptions of the work, not just in symphonic dimensions, but for everything from percussion ensemble to an orchestra of accordions. All orchestral versions are indebted to some extent to Ravel's masterful 1922 version, but Wingate's thoughtful and finely-crafted effort sits in a unique position on this list, providing a fresh perspective and sonic grandeur to Mussorgsky's masterwork." -- composer web site.

Pictures at an exhibition: Modest Moussorgsky/ed. Bricard

"Based on the autograph manuscript and earliest editions, editor Nancy Bricard addresses the sources and discrepancies between the various publications of Moursorgsky's most important contribution to piano literature - Pictures at an Exhibition. This well-researched edition describes the close relationship between the composer and Russian artist Victor Hartmann, whose paintings and sketches inspired the creation of this collection of musical works. Bricard offers fascinating insight into the composer's compositional process by including music passages in her footnotes that Moussorgksy had discarded from the autograph. Also discussed are matters of tempo, fingering, pedaling and interpretation, as well as background on the historical, cultural and social environment that influenced the composer's music." Pub. website

Piano solo \$10.95
Pub: Alfred Music Publishing

Bilder einer Ausstellung: ed. Rimsky-Korsakov Pub.Bessel (and Breitkopf & Härtel) 1886.

[Reprinted by many publishers]

This first publication was not a completely accurate representation of Mussorgsky's score, but presented a revised text that introduced a few editorial changes, along with a few errors and misreadings. Rimsky's editorial changes to this work were relatively minor. Rimsky wasn't nearly as heavy-handed with Pictures as with other of his late friend's works.

Pictures of an exhibition: ed. O. Thurmer Pub. Augener, 1914. "Interesting in that it has corrections of some items in Rimsky's that could only have been made with access to the autograph. The best pre-1939 edition."

6. Sites showing the "Pictures"

A site showing the few Hartmann "Pictures" that are still extant. "There are no more pictures to be found on the web. I'm searching for years now and I'm pretty sure of it."-- Hans van Riezen

<http://grotesmurf.madscience.nl/music/mussorg.htm>

If you do a Google Image search for "victor hartmann" you'll find jpg images of all of the works that Mussorgsky used that still survive, along with some other Hartmann images. Here are the Mussorgsky images within a descriptive Web page: <http://www.stmoroky.com/reviews/gallery/pictures/hartmann.htm>

Nine of the paintings and sketches are featured on this site:

[These may not be the ones Mussorgsky used. See the note below.]

* Go to the website <http://www.russisches-musikarchiv.de/>

* In the left frame...- Click "Bilder" under the blue heading "Einblick ins Archiv" and then the collage of three pictures at the top of the page to access *the Limoges*, *Cathedral*, and *Nuter (the Gnomus)*. The third one doesn't appear to be *Bydlo*.

* In the left frame again, click "Auszug: Mussorgskys Bilder einer Ausstellung." In the left column of the resulting page, you'll find the Chicken Costume (for the Ballet), *Catacombs* (which also represents the "With the dead in a dead language"), *Samuel Goldenberg*, *Schmuyle*, *Hut of Baba Yaga*, and *Great Gate of Kiev*. *Les Tuileries* and *Bydlo* are not there.

"It is likely that the pictures provided on the Hartmann galley at this website are not the ones Mussorgsky used in his "Pictures." The sketches are supposedly of a Limoges market woman, The Cathedral, a Jewish market woman (different from the first sketch), and the Gnomus. The Gnomus in particular was said to be lost long ago, which leads one to think the strange rooster device is not the correct painting. Also, note how these sketches are NOT under the "Pictures at an Exhibition" page, leading one to think that these Hartmann sketches were some not used in Mussorgsky's piece. Thus, although the pictures may not be the ones in which Mussorgsky found inspiration; they can give us a general idea of what he drew upon."

This site shows 6 pictures along with other information about the work:
